CINGULAR WIRELESS LLC
SPECTRUM OVERLAPS – ESTIMATED COMPETITORS

Cingular Wireless LLC (“Cingular”) hereby provides information on potential spectrum overlaps and CMRS carriers authorized to operate in the market areas to be acquired. Specifically, in Table 1, Cingular identifies all areas in which the spectrum it proposes to acquire will overlap with its remaining cellular, broadband PCS, and SMR spectrum holdings. In Table 2, Cingular has identified the cellular, broadband PCS, and enhanced SMR carriers that, as of September 23, 2003, were authorized to operate in the Basic Trading Areas (“BTAs”) in which licenses would be assigned in the proposed transaction. A description of the methodology and sources used to compile the data set forth in each table follows immediately thereafter.

Cingular is providing this information to the extent it is readily available in the FCC’s electronic databases and from other publicly available sources. Much of the information included in this attachment is not proprietary to Cingular and is in the public domain. Cingular has not independently attempted to verify the accuracy of such information, and wishes to emphasize that it cannot certify to the accuracy of such information.

Spectrum Included/Excluded. In conducting the overlap analysis in Table 1, Cingular has included the spectrum holdings of all entities in which Cingular holds a 10 percent-or-greater ownership interest as reported on its Form 602. Cingular has also included the limited non-Cingular CMRS holdings of its parents, BellSouth Corporation and SBC Communications Inc. This analysis assumes that previously-announced but as yet unconsummated transactions to which Cingular is a party have been consummated. The SMR holdings of Cingular Interactive L.P., a wholly owned subsidiary of Cingular, were not included due to a waiver excluding these holdings, which do not exceed 1.5 MHz in any given area, from the former spectrum cap provisions. See *Cingular Wireless LLC*, 16 FCC Rcd 17564 (2001).

Authorized Carriers in the BTA. The market boundaries for Major Trading Areas (MTAs) (used for assigning A & B block PCS licenses) and Metropolitan Statistical Areas (MSAs) and Rural Service Areas (RSAs) (used for assigning A & B block cellular licenses) do not coincide exactly with the boundaries of BTAs. An MTA will often consist of multiple BTAs, MSAs, and RSAs, and a BTA may consist of portions of multiple MSAs and RSAs. Therefore, a license assigned for an MTA, MSA, or RSA may be noted in multiple BTAs. Also while more than licensee may be listed in the cellular (A or B) column for a particular BTA, there are typically no more than two authorized cellular carriers (one A and one B block carrier) operating within any given area in the BTA. Further, given that large carriers often operate through subsidiaries that hold licenses, Cingular reviewed the available Form 602 ownership information listed for the authorized licensees to the extent practicable to determine the parent operating entity. SMR operators were identified by reviewing the coverage information available on the websites for Nextel and Southern Linc, i.e., known SMR operators that provide nationwide and regional coverage. Finally, this table lists only licensed facilities-based carriers, not resellers.

Offering Service. The identification of carriers offering service to the public is based on a review of the available coverage maps and other information obtained from the carriers' websites. As indicated on the carriers' websites, the coverage maps contain general representations of coverage and actual coverage may vary. Carriers listed with an (*) indicate that coverage information for the carrier could not be readily found. If there are multiple carriers listed within a license block within a particular BTA, the block is filled in as "offering service" if any one of the carriers is providing service in some portion of the BTA. Also, because available coverage information for individual carriers does not identify the spectrum block(s) upon which coverage is being provided, where a carrier holds multiple licenses in the same BTA, all spectrum blocks listing the carrier in that BTA are filled in as "offering service."
